Above: 5' Poly Cape Henry Style Lighthouse in Birch and Mahogany (Rustic Colors)

Poly lighthouses are maintenance-free, built to last a lifetime! It will not splinter or crack and needs no painting. It is environmentally friendly and made from recycled material. **Wooden lighthouses** are handcrafted from MDO (medium density overlay), an outdoor sign board that is weather resistant. The **hybrid lighthouse** is the perfect choice for those who love the striped and painted color scheme, but also prefer the maintenance free poly. Hybrid lighthouses are made with a poly top, wood center, and poly bottom plate or base. This means that the parts first to be affected by the weather are made of durable poly material.

Lighthouses come standard with a 25 watt bulb and 8' cord. Other lighting options are also available, such as a revolving light or solar light kit. Interior lighting is also available.

We offer many lighthouse designs that are a close replica of the original lighthouses up and down the coast of the USA.

Each design is shown below in its original colors, but they can also be customized with the colors of your choice!

*Poly models are not available in every replica style below due to design complexity. * Notes designs NOT available in poly*

A Patriotic color scheme can be applied to any design!
